Abstract

10

Recycle friendly aluminum alloys are described which are variants of AA 3000 and AA 5000 series alloys containing higher than usual amounts of silicon and iron. The alloys 5 contain in percentages by weight, more than 0.6 - 2.0% silicon, 0.9 - 2.4% iron, wherein the ratio of the amount of iron to the amount of silicon is in the range of 1.2 -1.8:1. Other components of the alloys may include 0 - 0.4% copper, 0 - 1.5% manganese, 0 - 5.0% magnesium, 0 - 0.5% zinc, 0 - 3.5% chromium, 0 - 0.1% titanium and the balance aluminum and incidental impurities.
